

CODEBREAKER

The names in bold fit into the grid, where each letter is represented by a different number between 1 and 20.

Look for similar patterns in the words and the grid numbers to break the code and work out which letter is represented by each number. Each time you work one out, write the letter in the appropriate KEY box, enter it in the grid in every square that the number appears, and cross it off the list of letters you need to find.

4 letter word:

BETH

5 letter words:

W. H. **AUDEN**
